INTERNATIONAL MANAGEMENT, ACCOUNTING, AND BUSINESS TOURNAMENT

THE 3rd TREASURE OFFICIAL BOOKLET

Circular Solutions for a Sustainable Future: Interdisciplinary Innovations for Daily Life

Malang, 3-14 June 2025

About TREASURE

Politeknik Negeri Malang (POLINEMA) is a vocational higher education institution located in Malang, Indonesia. One of the long-standing departments is the Accounting Department, which was established in 1986. The establishment of the department received assistance from The Australian Project. Since November 2004 Universitas Brawijaya Polytechnic has obtained an independent status to become State Polytechnic of Malang. In 2022, several study programs in Polinema have obtained an international accreditaton from ASIC, one of them is Master of Applied Study Program in Accounting Information Systems (Magister Terapan Sistem Informasi Akuntansi-MTSIA).

In 2022, the MTSIA has held the 1st TREASURE (International Management, Accounting and Business Tournament) competition with the theme "Capturing the Technology for Today's Management, Accounting, and Business". Participants compete with each other and argue regarding the quality and capability of using information system technology in the accounting field in the Industrial Revolution Era 4.0.

In 2023, the MTSIA continued organizing this tournament to foster discussions on current issues in Accounting, Management, and Business. The competition embraced the theme "Revolutionizing Accounting, Economy, Business, and Management: The Global Technology Challenge," encouraging young professionals in the business world to collaboratively explore, analyze, and discuss the evolving landscape of accounting technology. The aim was not to create anxiety about the future but to prepare participants to seize emerging opportunities with confidence and readiness.

About TREASURE 2025

The TREASURE 2025 International Management, Accounting, and Business Tournament challenges participants to develop innovative circular economy solutions focused on sustainability. Under the theme "Circular Solutions for a Sustainable Future: Interdisciplinary Innovations for Everyday Life", teams will create cross-disciplinary strategies that transform traditional economic models into regenerative systems, promoting environmental and economic sustainability through creative, practical approaches.

TREASURE Background

The TREASURE 2025 International Management, Accounting, and Business Tournament emerged from a collective recognition of the urgent need for interdisciplinary approaches to sustainability challenges. The competition was conceived to address the growing complexity of global environmental and economic issues that cannot be solved through single-disciplinary perspectives.

The organizers identified a critical gap in traditional educational and business frameworks. Many young professionals and students were found to be working within siloed approaches, lacking the holistic understanding needed to create truly transformative solutions. TREASURE was designed to bridge this gap, providing a platform for emerging talents to demonstrate how integrated management, accounting, and business strategies can drive sustainable innovation.

The competition reflects the evolving landscape of global business, where sustainability is no longer a peripheral concern but a core strategic imperative. By challenging participants to develop practical, interdisciplinary solutions for everyday life, TREASURE aims to cultivate a new young generation who can reimagine economic systems, reduce waste, and create value through innovative circular approaches. The 2025 edition builds upon previous years' successes, expanding its scope and deepening its commitment to fostering ground-breaking solutions that address the most pressing sustainability challenges of our time.

TOURNAMENT CATEGORIES

BUSINESS SIMULATION

- In the business simulation, participants will make strategic decisions in a real-time digital environment, demonstrating their ability to create economically viable and environmentally responsible innovations.
- Business Simulation is defined as an approximate imitation of an operation of a process or system in an organization where people work together to make and sell products or services. This operation is designed in a gaming format to create the maximum understanding of business processes in ERP.

POSTER

- Participants must be able to convey ideas or messages freely according to the theme and scope of the tournament in the form of texts, pictures or graphics.

Poster Instructions

1. All forms of writing which appear on the poster are written in English.

2. The poster must match the theme of the competition.

3. Poster may contain discussions about all forms of up-to-date activities that are in accordance with the theme.

4. The uploaded poster is a visual communication tool for ideas or messages in the form of texts or images.

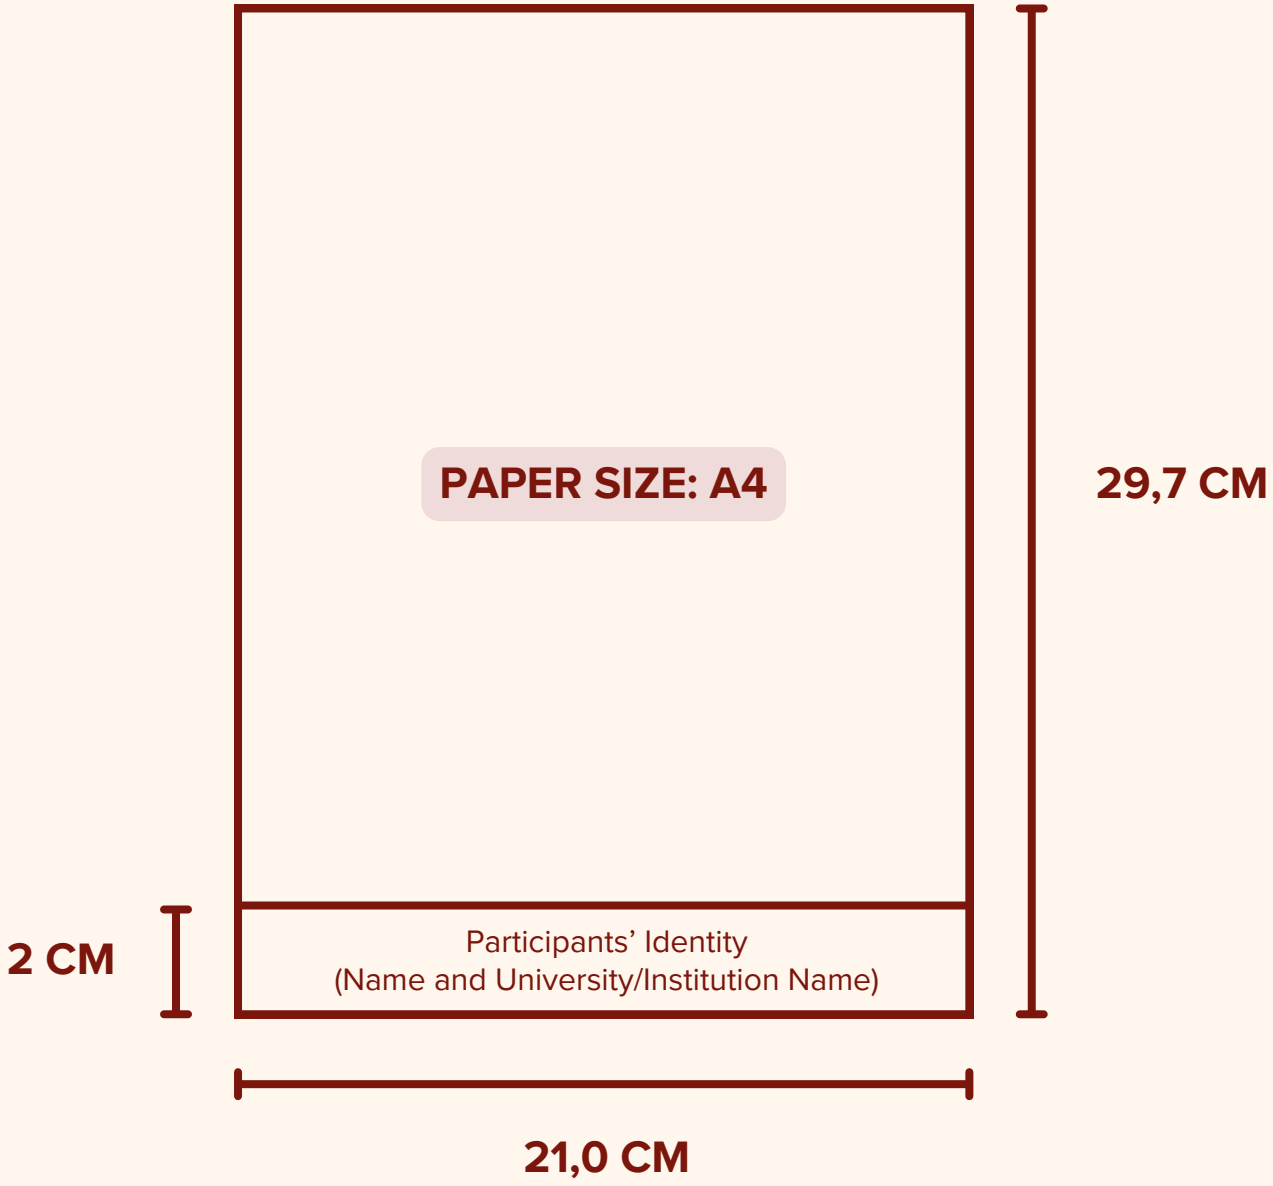

5. The poster must be renamed as follow: **Name_University**

6. The resolution is A4-sized poster and the formats should be in .png/.jpeg/.jpg

7. The uploaded file size accepted must not exceed 20 MB per poster.

8. Poster must display TREASURE logo, Polinema logo, and institution of origin logo.

Poster Dimension

Poster Instructions

The posters submitted in the competition are the work of participants and have never/are being entered in any similar competition.

Posters must not contain elements of racism, violence, immorality, provocativeness, and/or pornography.

Participants must sign a statement of work originality which could be downloaded on the website.

Posters registered to the competition will be selected by the judge to determine the best 10 finalists or depending on the number of participants.

The poster scoring criteria include several elements which will be explained more thoroughly below.

The poster finalists must present their work directly via Zoom on the final day of the competition to win prizes.
